Professional Summary

Strategy and operations professional connecting business and engineering across B2B SaaS and marketplaces. Translates product and user data into growth decisions, automates workflows, and builds AI tools to solve everyday operational problems.

Work Experience

Supply Bistro — **Ithaca, NY – Remote**

Product Operations Manager · B2B SaaS — *Sep 2026 – Present*

- Developing an AI-assisted catalog onboarding to address data-normalization gaps and standardize bulk product uploads.
- Evaluated 3PL partners on capabilities and API requirements to plan logistics integration for SMB buyers and distributors.
- Translated client needs into product roadmap and wireframes to guide engineering implementation of a subscription model.

Swiggy — **Hyderabad, India**

Strategic Account Manager · Food delivery marketplace — *Feb 2024 – Sep 2024*

- Owned a $2M/month GMV portfolio and raised partner profits by 30% via a growth strategy focused on contribution margin.
- Reached 60% market share in the city by designing dynamic promotions based on customer behavior and real-time demand.
- Reduced partner marketing spend by 15% and increased in-app visibility by 20% by advising partners on platform positioning.
- Analyzed monthly business performance using SQL to shape marketing plans and present recommendations to support partner growth and Swiggy ad revenue.

Becton, Dickinson and Company — **Bangalore, India**

Business Operations Manager · Healthcare device distribution — *Jun 2023 – Feb 2024*

- Grew regional revenue by 28% from a $36K/mo baseline through product adoption and clinical training in underserved markets.
- Improved inventory turnover by 30% by building a forecasting model to assess SKU-level demand and optimize reorder cycles.
- Negotiated and secured 8 long-term corporate and government contracts, maintaining 90% customer retention.

Amazon — **Bangalore, India**

Operations Management Intern · E-commerce — *Apr 2022 – Jun 2022*

- Improved ASIN audit categorization accuracy by 10% through analysis of gaps in the seller appeals process.
- Cut resolution time by 25% by automating bulk seller-appeal acknowledgments, improving SLA compliance.
- Identified compliance gaps and implemented fixes with Legal, Operations, and Support, reducing escalations by 15%.

Keywordio — **Pune, India**

Software Engineer · Digital marketing — *Jul 2019 – Aug 2020*

- Built CRM dashboards and automated bidding to optimize ad performance and budget allocation, increasing ROAS by 20%.
- Refactored database architecture and integrated Google Ads APIs in Django apps, reducing advertising query latency by 70%.
- Led engineering and marketing teams to develop 3 Python tools, streamlining global ad operations across 50+ accounts.

Education

Master of Technology Management, *University of California, Santa Barbara* — *Jun 2026*

MBA, Marketing & Operations, *Institute of Management Technology, Ghaziabad* — *Apr 2023*

Bachelor of Computer Science, *Fergusson College, Pune* — *Apr 2019*

Relevant Projects

Product Prototypes · *ChatGPT Codex, Claude Code*

- **Marketplace Operations**: Built a tool to analyze merchant funnel, flag conversion gaps, and recommend growth actions.
- **SnapText**: Built a tool to extract text and tables from images into editable formats, reducing manual transcription.

Deckers Brands · *Product & Market Analyst, HOKA* — *Dec 2025 – Jun 2026*

- Presented market-entry recommendations to executives, synthesizing market sizing across five sports categories, 60+ interviews, and operational feasibility into a phased GTM roadmap.
